

Software and Solutions

Empower your workforce, streamline daily tasks and improve operational visibility to optimize your most important assets and resources. Leverage Zebra's software and solutions portfolio to elevate your performance and prioritize your customers.

Additionally, Zebra Data Services offers cloud-based, unified APIs and developer tools enabling partners and developers to leverage edge data to build secure, scalable digital services with ease and speed.

ZEBRA WORKSTATION CONNECT™

Transform Zebra mobile computers and tablets into mobile-driven workstations and POS solutions, on demand. This powerful software solution doubles the functionality of your Zebra mobile device—increasing workforce efficiency, improving store operations and your return on investment.

ZEBRA SMARTLENS™

Turn your entire store into a smart store that automatically senses and records the location and movement of virtually everything in your retail space—merchandise and assets—and turns that data into easy-to-read actionable intelligence that helps prevent shrink and theft.

ZEBRA MOTIONWORKS™

From automatically sensing the location of assets and inventory, to improving the safety of people and streamlining production lines, Zebra MotionWorks enables proven solutions to turn location intelligence into business value.

ZEBRA SMARTCOUNT™

Zebra SmartCount is the most innovative and comprehensive self-scan, physical inventory management solution available to the retail industry worldwide. With simple out-of-the-box deployment, Zebra SmartCount delivers real-time inventory visibility with significant savings to better manage shrink, increase sales and ensure store inventories are as accurate as possible.

ZEBRA WORKFORCE CONNECT™

Consolidate critical workflows into one fully connected platform with Zebra Workforce Connect—the most complete solution for your frontline workforce. Unlock communication capabilities with powerful voice and messaging features to Zebra mobile devices, or third-party devices, to connect and empower frontline workers.

ZEBRA REFLEXIS™

Zebra Reflexis is the industry-leading cloud-based workforce management and task management solution platform for multi-site organizations. It helps simplify frontline operations and optimize labor decisions with the power of AI.

ZEBRA PRESCRIPTIVE ANALYTICS™

Drive retail profit through course-corrective actions with Zebra Prescriptive Analytics. It automatically translates your data into prioritized actions, automatically verifying execution for you. Now, you can combat total retail loss and gain complete control of your inventory from vendor to shelf to omni-channel customers, across your stores.

ZEBRA AURORA™

Get the power of one unified software platform to control your enterprise-wide manufacturing and logistics automation solutions. With Zebra Aurora's intuitive modern interface, experienced and first-time users alike can easily set up, deploy and run machine vision applications from simple to complex with Zebra Fixed Industrial Scanners, Smart Cameras or any of the products from our machine vision hardware portfolio.

ZEBRA INTELLIGENT CABINETS

Keep your assets and workflows functioning together with optimal security. Zebra Intelligent Cabinets offer end-to-end storage solutions, software automation, security applications and ongoing support to maximize the use and productivity of your enterprise mobile computers, mobile printers and tablets.

ZEBRA DIMENSIONING™

Zebra Dimensioning Certified Mobile Parcel captures accurate parcel dimensions and calculates shipping charges on Zebra mobile computers with a press of a button. And Mobile Parcel provides visibility into parcel dimensions to improve planning.

ZEBRA SYMMETRY™

Symmetry is cloud-based robotics software that gives you complete control of your robots and automation by deploying and fully integrating a wide range of automated workflows into your warehouse and manufacturing operations.

Global Services¹

Zebra Professional Services

Adding innovative technology is critical to your success, but it can be complex and disruptive. Leverage Zebra's Professional Services know-how to map out your needs and help prioritize what's important. We'll bring your teams together to collaborate, put the tools in place to help you rapidly develop solutions, and then test them to ensure they meet your performance targets and expectations to be confident in your tech decision.

- Better Built Solution
- Better Adoption
- Faster Completion
- Better Solution Management

Optimize Operations. Satisfy Customers. Drive Profits.
Zebra Professional Services

Zebra OneCare™ Maintenance Plans¹

Constant peak performance and device uptime—that's the upside of protecting your investment with Zebra OneCare services. Reduce device vulnerabilities, eliminate unexpected disruptions and unbudgeted repair expenses while enabling predictable performance, critical operations and improved business outcomes.

Pick the maintenance and support plan that's right for you, right for your device, right for your budget and right for your business. We understand one size doesn't always fit all. The choice of plans and flexible enhancements makes it pain-free to engage with Zebra experts for your ongoing support needs. All OneCare plans for mobile computers and scanners include access to VisibilityIQ™ OneCare², a cloud-based tool providing detailed insight into repair and support information, contracts, case lifecycle reports, LifeGuard™ Analytics, repair on-time delivery, repair rates and top repair metrics reports.

Technical and Software Support (TSS)

Available if a repair support plan is not purchased, you can still make sure your data is protected and you have support when needed. Access expert technical support and Zebra-exclusive software patches and software updates, including LifeGuard. This plan also provides support for software applications, both OEM and third-party.

Zebra OneCare Special Value (SV)

Right-priced protection for your value tier mobile devices and eligible printers. Coverage for normal wear and tear and device failures, 8x5 local time live-agent technical support, five-day repair turn-around time plus optional accidental damage repair coverage for value tier mobile devices.

Zebra OneCare Essential

Core service assurance. Comprehensive repair services cover accidental damage plus normal wear and tear, access to restricted software including LifeGuard security updates, 8x5 technical support, 24x7 online access to additional support materials and tools, three-day repair turn-around time and access to the Device Diagnostic Tool.

Zebra OneCare Select

Maximum device protection. Includes all features of Zebra OneCare Essential, plus next business day advanced device replacement, Standard Commissioning so devices are reloaded with settings, customer apps and software, required OS and LifeGuard versions, plus 24x7 live-agent technical support.

Zebra OneCare On-Site Support

If your devices are too vital to your business to send out for repair, or if your devices are too large or cumbersome to send in, one call can bring a Zebra-trained and certified technician to your door for one-on-one, personalized attention.¹

Zebra OneCare Battery Services Enhancements

Now, you can take the worry out of battery performance with a choice of Battery Services from Zebra. Battery Maintenance Service is available in two service levels—Standard and Premium—and extends Zebra OneCare's comprehensive coverage to the batteries in your Zebra mobile devices. And the advanced Proactive Battery Replacement Service is a prevention-based service—Zebra monitors the health of the batteries in your Zebra mobile devices and proactively sends replacements for batteries that can no longer hold a full charge, before worker productivity is impacted.

Zebra VisibilityIQ™ Services

Zebra's VisibilityIQ services provide deep, cloud-based insight into your devices to tell you how your devices are performing, so you can decide what next steps you can take to improve your operations and maximize productivity. Without clear, comprehensive data from the devices that run your business, you're in the dark trying to compensate with manual tracking, excessive inventory and repair.

VisibilityIQ gives you the data-driven, actionable insight when and how you need it. Get a clear view into how your devices are performing and know what next steps can push up productivity and drive down costs.

VisibilityIQ Foresight³

Zebra VisibilityIQ Foresight is focused on providing device health and utilization insights. The operational insights provide historical data trending, current state health and actionable predictive intelligence on what will occur if no action is taken. Its multi-source data aggregation and machine learning algorithms deliver a consolidated solution that provides color-coded insights with threshold alerts about your device inventory.

VisibilityIQ OneCare²

Included in all Zebra OneCare support contracts for Zebra mobile computers and scanners, the cloud-based tool provides status of device repairs, technical issues, contracts, case reports and software, LifeGuard™ Analytics, and more.

1. Service availability, Service feature and/or repair turn-around time may differ by country. Please contact your Zebra sales representative for details.
